919 How was the instructor most helpful to you?

Student 1

He was very helpful during the entire day. I really liked how he was available to us if our nurse was very busy to go give medications or whatever else our patient needed.

Student 2

Jeremy was wonderful! He was always available to help or answer questions, but was still willing to let us try things on our own as appropriate. He was an excellent instructor!

Student 3

He's instructions were relevant, he was available, focused and knowledgeable. He was very helpful with our project.

NURS 356 006

Student4

The instructor was very knowledgeable and always made sure we knew why we were doing something. He was very helpful in letting us know what was required of us. He always asked us how we felt we were doing and if there was anything more that he could do to help us.

Student 5

Followed my progress throughout clinicals and pulled me aside at times when needed to talk about what to improve and what's best for me.

Student 6

Jeremy was available when I needed assistance with any aspect of clinical, and very informative of my progress. Overall, Jeremy was a great instructor.

920 How was the instructor least helpful to you?

Student 1

He just was not prepared all the time and unsure of what to do for some things. Which I would attribute to this being his first time teaching a clinical.

Student 2

NA

Student 3

He was a very good instructor. I have no complaints.

Student 4

sometimes he was hard to get ahold of through e-mail.

Student 5

Not responding to emails sometimes! But it wasn't that big of a deal.

Student 1

professional yet fun and laid back atmosphere created by jeremy. I learned a lot and felt comfortable asking questions. This was my favorite clinical and jeremy did a great job

Student 2

Jeremy was very helpful and dedicated to his time spent with us on the clinical floor.

Student4

Jeremy was a great clinical instructor and was very helpful during and outside of clinical; answering questions about caremaps, skills, final project, etc. He looked for skills on the floor that I had not previously performed and made sure that I had the opportunity to do things I have not done in previous clinicals. He challenged me and asked me questions about medications, uses for, and how each would relate to the patient.
